

JANUARY 11 06 / TYPES OF MACHINE LEARNING / FRIDAY

Machine LearningSupervised machine learning

→ Regression

→ Classification

Unsupervised learning

→ Clustering

→ Dimensionality Reduction

→ Association Rule learning

→ Anomaly Detection

Semi-Supervised learningReinforcement learningSupervised ML

→ Regression

→ Linear Regression

→ Simple linear Regression

→ Multiple linear Regression

→ Polynomial regression

→ Ridge, Lasso, Elastic net regression

Logistic Regression

FEBRUARY

2014

M	T	W	T	F	S	S	M	T	W	T	F	S	S
					01	02	03	04	05	06	07	08	09
10	11	12	13	14	15	16	17	18	19	20	21	22	23
24	25	26	27	28									

Notes :

SATURDAY

Binary Classification

Multi-class Classification

Algorithm Use :

- 1. KNN (K-nearest neighbour)
- 2. SVM
- 3. Decision Tree
- 4. Logistic Regression
- 5. Naive Bayes
- 6. Ensemble Methods

→ Random Forest

(Bagging)

Booging

AdaBoost

Gradient Boosting - (GBM)

Light GBM

XGB Boost

Cat Boost

12 - Sunday

Notes :

JANUARY

2014
